FOREWORD

The Research Directory for Manpower, Personnel, Training, and Human Factors lists individuals who perform and/or manage current people-related Research and Development and Studies and Analysis efforts for the Department of Defense. It is one of several documents produced at the Manpower And Training Research Information System (MATRIS) Office in San Diego, CA.

DIRECTORY DESCRIPTION

The Work Unit and Studies record titles included in this <u>Directory</u> represent efforts from the beginning of FY90 to the present which are currently active (on-going) in MATRIS, or which have been active during that time. Most of the data has been obtained from Research and Technology Work Unit Summaries (DD1498s). Out-of-date information found in any reference in this <u>Directory</u> may reflect data that has not been updated on that form. The <u>Directory</u> is arranged as follows:

- 1. Each reference is categorized according to one of twelve major R&D areas:
 - 1.0 Recruitment
 - 2.0 Selection/Classification/Assignment
 - 3.0 Training/Education
 - 4.0 Instructional Technology Development
 - 5.0 Personnel Measurement/Evaluation
 - 6.0 Personnel Management/Administration
 - 7.0 Organizational Development
 - 8.0 Manpower Management
 - 9.0 Human Performance Measurement
 - 10.0 Human Factors Engineering
 - 11.0 Human Resource Data
 - 12.0 People-Related R&D Management
- 2. Within these R&D areas, the records are sorted into four Service categories: Army, Navy, Air Force, and OSD.
- 3. Within each of these categories, managers and researchers are listed alphabetically. An asterisk (*) following any name indicates that the person is the principal researcher; otherwise, the person is the manager for the research effort. Organization names and telephone numbers are included according to availability.
- 4. Research efforts are then listed for each researcher. Each title appears twice: once with the research manager and once with the researcher. If the person is responsible for more than one study, titles for each study are printed. Managers and researchers with multiple areas of expertise may appear in more than one section.

- 5. An <u>Alphabetical Index</u> of names of managers and researchers is included at the back of the <u>Directory</u>.
- 6. Following the <u>Index</u>, <u>Appendix A</u> gives the primary "people-related" DoD laboratories, with addresses and telephone numbers, and shows the number of records covered in this volume for each lab. [NOTE: This edition does not reflect changes related to the newly consolidated <u>Armstrong Laboratory</u>, in which: (a) the Air Force Human Resources Laboratory (AFHRL) will now reside as two new directorates, the <u>Human Resources Directorate</u>, and the <u>Crew Systems Directorate</u>; and (b) the Armstrong Aerospace Medical Research Laboratory (AAMRL) will reside as the <u>Aerospace Medicine Directorate</u>.]
- 7. Appendix B lists representatives from The Technical Cooperation Program (TTCP). TTCP is a collaborative group of research managers and policy makers from Australia, Canada, Great Britain, New Zealand, and the United States. The purpose of TTCP is R&D coordination and dissemination. The individuals listed are from the Behavorial Sciences Subgroup (Subgroup U) of TTCP.

We welcome your comments and suggestions for additions or improvements to the <u>Directory</u>. If, for example, your telephone number or organization has changed, please use the enclosed Reply Card to help us update our database and the next edition.

MANPOWER AND TRAINING RESEARCH INFORMATION SYSTEM (MATRIS)

MATRIS collects, stores, updates, retrieves, and disseminates information on people-related research within DoD. Research areas covered in MATRIS include Manpower and Personnel, Education and Training, Simulation and Training Devices, and Human Factors Engineering. The content and criteria for research to be included in MATRIS were established in cooperation with OUSD/R&E and OASD/FM&P.

MATRIS can provide information on Program Element and Project descriptions, Congressional Category identification, and DoD Budget Category breakdowns, in addition to the specific subject area information typically requested from the Work Unit/Studies & Analysis records. Using a flexible retrieval system, MATRIS provides researchers, managers, and planners with timely reports on research topics and on R&D management information. These reports can be used to identify related research, uncover research gaps, help avoid redundancy, and help provide an overall picture of current DoD people-related R&D.

MATRIS uses a hierarchical vocabulary of research topics and methods, the <u>Human Resources Research Indexing Vocabulary (HRRIV)</u>. The twelve major research areas listed above are the major categories of this vocabulary.

MATRIS can search with combinations of approximately 1,800 vocabulary terms and can include, delete, or sort on various other data elements to produce many types of reports. These uniquely tailored reports are produced in response to specific user inquiries.

If you would like more information about MATRIS, please contact:
